Concept of e –Learning

“The automation of the process of learning and training through the use of information technology” Robson (2002)

e-Learning is synonymous with

- **Multimedia learning,**
- **Technology-enhanced learning (TEL)**
- **Computer-based instruction (CBI)**
- **Computer-based training (CBT)**
- **Computer-assisted instruction or Computer-aided instruction (CAI)**
- **Internet-based training (IBT),**
- **Web-based training (WBT)**
- **Online education**
- **Virtual education**
- **Virtual Learning environments (VLE)**
(which are also called learning platforms),
- **m-Learning, and**
- **Digital educational collaboration**

Traditional and e-Learning Approach

	Traditional Classroom	e-Learning
Classroom	<ul style="list-style-type: none">• Limited• Synchronous	<ul style="list-style-type: none">• Unlimited• Sync and asynchronous
Content delivery	<ul style="list-style-type: none">• Chalk and talk• PowerPoint/ transpar• Textbooks / library• Video• Collaboration	<ul style="list-style-type: none">• Multimedia / simulation• Digital library• On demand• Syn & Asyn. Communication
Personalization	<ul style="list-style-type: none">• solitary learning path	<ul style="list-style-type: none">• Learning path and pace are based on the needs of learner

History

- ❖ 1960 - the University of Illinois developed system of accessing informational resources while listening to the lectures that were recorded**
- ❖ Stanford University experimented with using computers to teach math**
- ❖ 1963, Bernard – developed computer assisted instruction**
- ❖ 1976, Bernard Luskin launched a "college without walls" using television station**
- ❖ Mid-1980s, accessing course content become possible at college libraries**
- ❖ The Open University and the University of British Columbia – used the Internet to deliver distance learning and online discussion between students**
- ❖ With the advent of World Wide Web in the 1990s, teachers embarked on the method using emerging technologies to employ multi-object oriented sites, which are text-based online virtual reality system, to create course websites along with simple sets instructions for its students**

According to a report by KPMG, the Indian online education industry will grow from 1.6 million users in 2016 to 9.6 million users by 2021. (Source: www.economicstimes.indiatimes.com/articleshow/68850167.cms?utm_source=contentofinterest&utm_medium=text&utm_campaign=cppst)

Looking into the pace of technological development, CEO of shinelearning.com said that *“Professionals will be required to re-skill themselves every 3-4 years to remain relevant in their evolving job roles”*

Key e-Learning service providers

Coursera: collaborated with universities, museums and other educational institutions and provides free educational contents on a range of subject matter areas

W3schools: Free e-Learning website for educating learners about various aspects of web design (HTML, PHP, SQL, JQuery, More etc.)

TEDEd: General educational topical videos of less than 10 minutes on various topics for free of cost

e-Learning service providers

- Open culture
- Open Yale courses
- Academic earth Exambazaar
- Traditional tuitions EdX
- Online tuitions Udemy
- Extra marks Aakash Digital
- WizIQ Eduncle.com
- Madeeasy.com
- Aglasem
- Digital Eklavya

Synchronous and Asynchronous e- Learning

Synchronous e- Learning	Asynchronous e- Learning
Occurs in real-time, with all participants interacting at the same time	Self-paced and allows participants to engage in the exchange of ideas or information without the dependency of other participants' involvement at the same time.
Involves the exchange of ideas and information with one or more participants during the same period of time Ex: A face-to-face discussion	Use technologies such as e mail, blogs, and discussion boards, as well as web-supported textbooks, hypertext documents, audio video courses

Advantages of e-Learning

- Open access to education, including degree programs
- Integration of non-full-time students, particularly in continuing education
- Improved interactions between students and instructors
- Enable students to independently solve problems
- Technological skills through practice and computers
- No age-based restrictions on difficulty level, i.e. students can go at their own pace

Disadvantages of e-learning

- ✓ Ease of cheating
- ✓ Bias towards tech-savvy students over non-technical students
- ✓ Teachers' lack of knowledge and experience to manage virtual teacher-student interaction
- ✓ Lack of social interaction between teacher and students
- ✓ Lack of direct and immediate feedback from teachers
- ✓ Asynchronic communication hinders fast exchange of question
- ✓ Danger of procrastination (defer action)

Conclusion

- An opportunity for disadvantaged section of society
- Farmers can exploit the potentials of e-Learning
- Learning for understanding leading to adoption of innovation
