

# **Principles and objectives of Extension Education**

- Principle - fundamental truth or proposition that has to be pursued.
- A principle also means rule or law that should be followed.

# Principles of extension education

1. ***Principle of interest & need.*** Extension work must be based on the needs & interests of the people. These needs & interests differ from individual to individual, from village to village, from block to block, & from state to state &, therefore, there cannot be one programme for all people.
2. ***Principle of cultural difference.*** Extension work is based on the cultural background of the people with whom the work is done. Improvement can only begin from the level of the people where they are. This means that the extension worker has to know the level of the knowledge, & the skills of the people, methods & tools used by them, their customs, traditions, beliefs, values, etc. before starting the extension programme.
3. ***Principle of participation.*** Extension helps people to help themselves. Good extension work is directed towards assisting rural families to work out their own problems rather than giving them ready-made solutions. Actual participation & experience of people in these programmes creates self-confidence in them & also they learn more by doing.
4. ***Principle of adaptability.*** People differ from each other, one group differs from another group & conditions also differ from place to place. An extension programme should be flexible, so that necessary changes can be made whenever needed, to meet the varying conditions.

6. ***The leadership principle.*** Extension work is based on the full utilisation of local leadership. The selection & training of local leaders to enable them to help to carry out extension work is essential to the success of the programme. People have more faith in local leaders & they should be used to put across a new idea so that it is accepted with the least resistance.
7. ***The whole-family principle.*** Extension work will have a better chance of success if the extension workers have a whole-family approach instead of piecemeal approach or separate & unintegrated approach. Extension work is, therefore, for the whole family, i.e. for male, female & the youth.
8. ***Principle of co-operation.*** Extension is a co-operative venture. It is a joint democratic enterprise in which rural people co-operate with their village, block & state officials to pursue a common cause.
9. ***Principle of satisfaction.*** The end-product of the effort of extension teaching is the satisfaction that comes to the farmer, his wife or youngsters as the result of solving a problem, meeting a need, acquiring a new skill or some other changes in behaviour. Satisfaction is the key to success in extension work. "A satisfied customer is the best advertisement."
10. ***The evaluation principle.*** Extension is based upon the methods of science, & it needs constant evaluation. The effectiveness of the work is measured in terms of the changes brought about in the knowledge, skill, attitude & adoption behaviour of the people but not merely in terms of achievement of physical targets.

# Objectives of Extension

- To assist people to discover and analyze their problems and identify the felt needs
- To develop leadership among people and help them in organising groups to solve their problems
- To disseminate research information of economic and practical importance in a way people would be able to understand and use
- To assist people in mobilizing and utilizing resources which they have and which they need from outside
- To collect and transmit feedback information for solving management problems

# Conclusion

- Extension helps people to discover the needs
- Extension develops leadership among people
- Extension motivates people to adopt the latest research outcomes for bringing in socio-economic changes
- With efficient feedback mechanism extension believes in solving the problems of its clients
